

CWSEI – PHYS & ASTRO Newsletter

December 2010

Best wishes for 2011 from all of us!

We are pleased to welcome the newest member of our PHAS-CWSEI group, Dr. Cynthia Heiner. She is one of our three full-time STLFs, together with Louis and Peter. The part-time STLFs James, Jim and Ido complete our current group. Feel free to stop any of them with any questions – they are all happy to help!

We were also very pleased to have Prof. Marjan Zadnik from Perth, Australia, visit us during part of his sabbatical. Hopefully many of you had a chance to meet him and talk to him, and hopefully he'll visit us again!

For the past 9 months, we used this newsletter to update you on various CWSEI-related activities on-going in our department. Most issues were written by instructors involved in in-depth course transformations, since I believe that they are the best placed to inform all of us on how these new teaching methods really work in classrooms. The question is how many of you find this to be an efficient way to keep up-to-date with the CWSEI activities. Please complete the survey and return it to my (Mona's) mailbox. Thank you!

Do you read this newsletter? Never Rarely Sometimes Always
Is this information of interest to you? Never Rarely Sometimes Always
Do you have any other suggestions on what we should do to publicize these activities?
